

PROFILE

Gamer at heart, game developer by passion. Game Director and Lead Developer with experience in VR/XR and studio building. Founder of an independent game studio, leading a 10-person team across programming, art, audio, and narrative. Experienced in Unity, VR optimization, and practical AI tools to accelerate content creation and internal workflows.

TECHNICAL SKILLS

-  Unity, C#, Unreal Engine, C++, Visual scripting, Web development
-  VR development, rapid iteration, CPU optimization, debugging, and troubleshooting
-  AI leveraging, Prompt engineering, AI-generated content pipelines with Generative APIs

LEADERSHIP & DIRECTION

-  Videogame pre-production, production and vision through technical planning and constraints. Teamwork, mentorship, leadership in cross-disciplinary teams.

EDUCATION

VR/AR Design and Development

Vancouver Film School - Aug 2022

Computer Science Engineering

Instituto Tecnológico y de Estudios Superiores de Monterrey - Dec 2020

Videogame design & programming

Vancouver Film School - Jul 2019

PROFESSIONAL EXPERIENCE

Game Director and Lead Developer

[Jolsom Games](#), [POK](#) / Mexico City, Mexico / August 2025 – Present

Leading the development of **POK**, an in-progress arcade sports game blending fast-paced gameplay with narrative elements, developed in Unity for PC and consoles.

- Defining core gameplay systems, technical architecture, and development constraints while remaining hands-on in Unity implementation.
- Coordinating a 10-person multidisciplinary team across production, programming, game design, art, audio, and narrative, supporting sprint planning, task breakdown, and cross-disciplinary alignment.
- Establishing production pipelines and iteration workflows to enable rapid prototyping, clear ownership, and scalable development.

Game Developer

[Greensky Games](#) / Montreal, Canada / August 2023 – April 2025

Contributed to the development and release of three VR games across multiple platforms, owning feature implementation and maintaining high production quality. Acted as a backup technical and project lead, supporting sprint coordination, technical decision-making, and cross-disciplinary alignment until being assigned an independent project.

[Shadow Chambers](#) / [Greensky Games](#) / [Unity Lead Developer](#) / 2025

- Solely designed and developed all core gameplay systems for the VR demo, including game flow, puzzles, AI-driven content, scene management, audio, UI, and localization.
- Built and optimized a full VR demo from the ground up, ensuring Meta Quest Store compliance and high-performance delivery.
- Led Unity development and pipeline definition, scaling workflows and collaborating closely with developers and artists to maintain quality and efficiency.
- The completed VR demo directly supported the studio in securing \$1.5M CAD in Canada Media Fund funding, validating the project's technical and production readiness.

[Chronostrike](#) / [Greensky Games](#) / [Unity Intermediate Developer](#) / 2024

- Led audio programming by developing a centralized Wwise-based audio system supporting timeline-driven development and multiplayer features.
- Implemented multiplayer-aware systems, including Vivox voice integration and reactive VFX driven by player audio.

[Swarm 2](#) / [Greensky Games](#) / [Unity Intermediate Developer](#) / 2023

- Optimized gameplay features across Meta Quest and Pico platforms using platform-specific SDKs.
- Developed advanced gameplay systems and designer-friendly tools, including procedural enemy behavior, state machines, and inverse kinematics.

QA Automation Engineer

[Solera, Inc](#) / Mexico City / December 2020 – December 2021

Digital Innovation & Technology – IT Applications Intern

[Schneider Electric](#) / Mexico City / September 2019 – June 2020
